

### **attention deficit hyperactivity disorder pdf**

Attention deficit hyperactivity disorder (ADHD) is a mental disorder of the neurodevelopmental type. It is characterized by difficulty paying attention, excessive activity, or difficulty controlling behavior which is not appropriate for a person's age. The symptoms appear before a person is twelve years old, are present for more than six months, and cause problems in at least two settings ...

Is it hard for your child to sit still? Does your child act without thinking first? Does your child start but not finish things? If so, your child may have attention deficit hyperactivity disorder (ADHD).

### **Attention Deficit Hyperactivity Disorder | ADHD | ADD**

Attention deficit hyperactivity disorder predominantly inattentive (ADHD-PI or ADHD-I), is one of the three presentations of attention deficit hyperactivity disorder (ADHD). It was formerly known as attention deficit disorder (without hyperactivity), but the term was formally changed in 1994 in the Diagnostic and Statistical Manual of Mental Disorders, fourth edition (DSM-IV), to "ADHD ...

### **Attention deficit hyperactivity disorder predominantly**

ADHD is one of the most common neurobehavioral disorders of childhood. It is usually first diagnosed in childhood and often lasts into adulthood. Children with ADHD have trouble paying attention, controlling impulsive behaviors (may act without thinking about what the result will be), and in some cases, are overly active.
