Charter schools in the United States are primary or secondary education institutions that do not charge fees to pupils who take state-mandated exams. These charter schools are subject to fewer rules, regulations, and statutes than traditional state schools, but receive less public funding than public schools, typically a fixed amount per pupil. There are both non-profit and for-profit charter ...

Plastic is material consisting of any of a wide range of synthetic or semi-synthetic organic compounds that are malleable and so can be molded into solid objects.. Plasticity is the general property of all materials which can deform irreversibly without breaking but, in the class of moldable polymers, this occurs to such a degree that their actual name derives from this specific ability.
