The history of computer development is often referred to in reference to the different generations of computing devices. A generation refers to the state of improvement in the development of a product. This term is also used in the different advancements of computer technology. With each new generation, the circuitry has gotten smaller and more advanced than the previous generation before it.

Practical information for Linux users, and for computer users leaving Windows and 'going Linux'.

Going Linux Â· Shownotes

Visual perception is the ability to interpret the surrounding environment using light in the visible spectrum reflected by the objects in the environment.This is different from visual acuity which refers to how clearly a person sees (for example "20/20 vision"). A person can have problem with visual perceptual processing even if he/she has 20/20 vision.
