Deep Neural Network (DNN) is another DL architecture that is widely used for classification or regression with success in many areas. It's a typical feedforward network which the input flows from the input layer to the output layer through number of hidden layers which are more than two layers . Fig. 1 illustrates the typical architecture for DNNs where N_i is the input layer contains of ...

Fingerprint identification, known as dactyloscopy, or hand print identification, is the process of comparing two instances of friction ridge skin impressions (see Minutiae), from human fingers or toes, or even the palm of the hand or sole of the foot, to determine whether these impressions could have come from the same individual. The flexibility of friction ridge skin means that no two finger ...

International relations theory is the study of international relations (IR) from a theoretical perspective. It attempts to provide a conceptual framework upon which international relations can be analyzed. Ole Holsti describes international relations theories as acting like pairs of coloured sunglasses that allow the wearer to see only salient events relevant to the theory; e.g., an adherent ...
