

### **global climate change the pdf**

Findings about climate change are continually analysed and tested. Some areas of active debate and ongoing research include the link between ocean heat content and the rate of warming, estimates of how much warming to expect in the future, and the connections between climate change and extreme weather events.

climate change, and the economic costs, technological advances and societal adaptations that are necessary for mitigation. International agreements, supported by hard science, are proving effective in

### **Climate change and human health - WHO**

Enormous progress has been made in increasing our understanding of climate change and its causes, and a clearer picture of current and future impacts is emerging. Research is also shedding light on actions that might be taken to limit the magnitude of climate change and adapt to its impacts.

### **Climate Change - nas-sites.org**

The Intergovernmental Panel on Climate Change (IPCC) projects that the average surface temperature of the Earth is likely to increase by 3.2 °F to 7.2 °F (1.8 °C to 4.0 °C) by the end of the 21st century, relative to

1980-1990 (IPCC, 2007c).
