ENGN 1560 Laser Lab Preparatory steps: 1. ... It is good laser safety practice to never put your eye at this level. (b) Do NOT touch the Uniphase alignment laser or the mirrors that are used to direct that laser beam. These components are already carefully aligned. Realigning them is difficult and tedious.

Good Laboratory Practices Questions and Answers

In a manufacturing environment they generally perform final tests on lasers and laser systems to ensure that they comply with customer specifications. In order to be fully effective in their job functions they must understand laser and optics principles, laser beam performance specifications, and also good laser lab and manufacturing practices.

Basic Laser Technology: Good Laser Lab and Manufacturing

Lab 10: Spatial Profile of a Laser Beam 1 Introduction ... good Laser cavity allows only the fundamental (or TEM₀₀) mode to be amplified. This mode has a Gaussian spatial profile. The laser that is being used in this lab produces a number of spatial modes. Equation 3 is therefore only an approximation of the spatial profile of the laser.
