Ecological economics (also called eco-economics, ecolonomy or bioeconomics of Georgescu-Roegen) is both a transdisciplinary and an interdisciplinary field of academic research addressing the interdependence and coevolution of human economies and natural ecosystems, both intertemporally and spatially. By treating the economy as a subsystem of Earth's larger ecosystem, and by emphasizing the ...

A steady-state economy is an economy made up of a constant stock of physical wealth (capital) and a constant population size. In effect, such an economy does not grow in the course of time. The term usually refers to the national economy of a particular country, but it is also applicable to the economic system of a city, a region, or the entire world.

History of WCSB Light Oil Production. Although there were earlier light oil discoveries in western Canada, such as Turner Valley in 1914, Norman Wells in 1920, and heavy oil at Wainwright in 1923, the giant Leduc

discovery in 1947 really marked the beginning of the oil age in western Canada.
