A hackathon (also known as a hack day, hackfest or codefest) is a design sprint-like event in which computer programmers and others involved in software development, including graphic designers, interface designers, project managers, and others, often including subject-matter-experts, collaborate intensively on software projects.. The goal of a hackathon is to create usable software or ...

Hackathon - Wikipedia

Lisp machines are general-purpose computers designed to efficiently run Lisp as their main software and programming language, usually via hardware support.They are an example of a high-level language computer architecture, and in a sense, they were the first commercial single-user workstations.Despite being modest in number (perhaps 7,000 units total as of 1988), Lisp machines commercially ...
