Neuroscience (or neurobiology) is the scientific study of the nervous system. It is a multidisciplinary branch of biology that combines physiology, anatomy, molecular biology, developmental biology, cytology, mathematical modeling and psychology to understand the fundamental and emergent properties of neurons and neural circuits. The understanding of the biological basis of learning, memory ...

Why do we think we're so bad at maths, when we're all - almost all - born with brain circuits specialised for numbers? Our ability to use numbers has been the key from taking us from the Stone Age to the Phone Age. Trade, science and technology would be impossible without this ability. Neuroscientist Brian Butterworth argues that we are all born with brain circuits specialised for numbers.

The state of flow has been rarely investigated from a neuropsychological perspective but is a growing interest. According to Dietrich, it has been associated with decreased activity in the prefrontal cortex.. The prefrontal cortex is an area responsible for higher cognitive functions such as self-reflective consciousness, memory, temporal integration, and working memory.
