Fish physiology is the scientific study of how the component parts of fish function together in the living fish. It can be contrasted with fish anatomy, which is the study of the form or morphology of fishes. In practice, fish anatomy and physiology complement each other, the former dealing with the structure of a fish, its organs or component parts and how they are put together, such as might ...

I was recently asked what the main differences were between the 8th edition of the Handbook of Neurosurgery and the previous 7th edition. While it is easy to point to the new section on endovascular neurosurgery, and to mention the updates in molecular genetics of brain tumors as well as the hundreds of content updates throughout the book, I feel that one of the most significant differences is ...
