Heart disease is the leading cause of death for both men and women. But, the good news is that it's also one of the most preventable health conditions. Many of the factors that have a strong influence on heart disease risk are related to your diet and lifestyle. This means that the choices you make to care for your heart will go a long way in reducing your risks, and keep your heart healthy ...

Health Information Exchange (HIE), the recently released issue brief highlights the importance of a sustainable public HIE. State-run HIEs are mainly utilizing two types of usage fees and, in some instances, using a combination of the two. The first model, the transaction fee model, is used when charging for each set of data that is sent or received.

### **HIE Health Information Exchanges**

A high overall ranking indicates lower prevalence of mental illness and higher rates of access to care. A low overall ranking indicates higher prevalence of mental illness and lower rates of access to care.
