Organic farming is a phrase coined early in the 20th century in reaction to rapidly changing farming practices to describe what other species use, and used, to farm without synthetic chemicals. Organic farming continues to be developed by various organic agriculture organizations today. It relies on fertilizers of organic origin such as compost manure, green manure, and bone meal and places ...

A striking aspect of the distribution of "potentially available cropland" is that, from a regional perspective, much of Africa's unutilized arable land is found in just a few countries (Chamberlin et al., 2014, Deininger et al., 2011). Depending upon the definitions and assumptions used, as much as 90% of SSA's unutilized arable land is located in just 8 countries ().
