## Soap making made easy - Natural Ingredient

from the mold. Make sure that the soap is firm before you remove it. 2. Cut your soap to the desired size. 3. Place cut soap on a paper bag and let cure for 4-8 weeks. With Castile soap, the cure time is 6 months. 4. Soap is usable after two days, however, the lye is still active in the soap, so until the water is fully dissipated from the soap ...

## **Cold Process Soap Making**

To remove the soap from the mold, lift it by the ends of the overhanging cotton (saran or freezer paper) lining. Cut into bars by wrapping the soap once with a fine wire or string (dental floss is good), crossing ends and pulling. Place soap so air can reach it, but avoid drafts and cold. Soap protected from drafts and cold lathers better.

#### **Homemade Soap**

Soap Making Methods Cold Process This is probably the most commonly used soap making method. This involves making soap from scratch using fats or oils, and lye. It takes more time to create cold process soaps than it is to make soaps through the other methods.
