

hospital associated infections epidemiology pdf

A hospital-acquired infection (HAI), also known as a nosocomial infection, is an infection that is acquired in a hospital or other health care facility. To emphasize both hospital and nonhospital settings, it is sometimes instead called a health care-associated infection (HAI or HCAI). Such an infection can be acquired in hospital, nursing home, rehabilitation facility, outpatient clinic, or ...

Epidemiology - Virginia Department of Health

INTRODUCTION. Hospital-acquired (or nosocomial) pneumonia (HAP) and ventilator-associated pneumonia (VAP) are important causes of morbidity and mortality despite improved prevention, antimicrobial therapy,

and supportive care [].The treatment of HAP and VAP will be reviewed here.

Treatment of hospital-acquired and ventilator-associated

Hospital-acquired pneumonia (HAP) or nosocomial pneumonia refers to any pneumonia contracted by a patient in a hospital at least 48â€“72 hours after being admitted. It is thus distinguished from community-acquired pneumonia.It is usually caused by a bacterial infection, rather than a virus.. HAP is the second most common nosocomial infection (after urinary tract infections) and accounts for 15 ...
