All the giraffes thought this was normal-and it was at that time! But here is the story about how giraffes got long necks! It was a hot summer's day and all the giraffe families came together to have a picnic. All the little giraffes were playing games and the mothers and fathers were talking.

How Giraffes Got Long Necks - Myths and Legends from E2BN

The giraffe's long neck can reach more than 7 feet in length, which means it makes up nearly half of its overall height. Just like humans, giraffes have seven vertebrae in their necks, but theirs "unlike ours" can each be over 10 inches long. There are a couple of theories about why giraffes have such long necks.

How Giraffe Got Such Long Necks: Genome Sequencing Reveals

All living giraffes are considered to belong to one species, *G. camelopardis*. But a 2007 genetic study suggested that the animal's many subspecies may actually be separate species.

How the giraffe got its long neck | Science News

So only those giraffes who were tall enough to reach the highest branches survived. All the others died. The long-necked giraffes who could reach the highest branches had baby giraffes who would grow to be tall like them. And, as time passed, those giraffes evolved: their necks grew longer and longer.

The Giraffe's long neck - Crossroad.to

The giraffe (*Giraffa*) is a genus of African even-toed ungulate mammals, the tallest living terrestrial animals and the largest ruminants. The genus currently consists of one species, *Giraffa camelopardalis*, the type species. Seven other species are extinct, prehistoric species known from fossils.

Giraffe - Wikipedia

Giraffes eat most of the time and, like cows, regurgitate food and chew it as cud. A giraffe eats hundreds of pounds of leaves each week and must travel miles to find enough food.

Chika Ike on Instagram: Before I got my picture perfect

Giraffes grow about 4 feet (1.2 meters) in their first year of life. A newborn giraffe is about 6 feet (1.9 meters) tall at birth and weighs about 150 pounds (68 kilograms). Many young giraffes, called calves, die from lion attacks during their first year of life.

Giraffe - Kids

When a giraffe baby, called a calf, is born, it comes into the world front feet first, followed by the head, neck, and shoulders. Its entry is like a slow-motion swan dive! Because the umbilical cord is only about 3 feet (1 meter) long, it breaks midway through the birth, allowing the newborn to drop to the ground.
