The broaden-and build-theory could be defined as a model for explaining the mechanisms behind positive emotions in our minds and bodies, what their effects are, what the evolutionary reason is behind them and why studying them is so important for our well-being. Studying emotions has always been a ...

Consumer confidence is an economic indicator that measures the degree of optimism that consumers feel about the overall state of the economy and their personal financial situation. If the consumer has confidence in the immediate and near future economy and his/her personal finance, then the consumer will spend more than save.

Defining the Difference: Self-Efficacy, Self-Confidence, and Self-Esteem. While most people generally think of self-esteem and self-confidence as two names for the same thing, and probably rarely think about the term â€œself-efficacy,â€• these three terms hold slightly different meaning for the psychologists who study them (Druckman & Bjork, 1994; Oney, & Oksuzoglu-Guven, 2015).

In computer programming and software testing, smoke testing (also confidence testing, sanity testing, build verification test (BVT) and build acceptance test) is preliminary testing to reveal simple failures severe enough to, for example, reject a prospective software release. Smoke tests are a subset of test cases that cover the most important functionality of a component or system, used to ...

P Values and Confidence Intervals Speaking of confidence intervals, let's bring them back into the picture. It's possible to show that the two definitions of statistical significance are compatible--that getting a p value of

less than 0.05 is the same as having a 95% confidence interval that doesn't overlap zero. I won't try to explain it, other than to say that you have to slide the confidence ...
