Download system simulation by geoffrey gordon - TraDL

Recent years have seen a very rapid growth in the use of digital computers for simulation work, particularly in the field of system studies. The need for such simulation has been generated by the ever-increasing complexity of systems that are being designed, while the speed and capacity of modern digital computers have provided the means by which to expand simulation efforts.

History. GPSS was developed by IBM's Geoffrey Gordon at the beginning of the 1960s. He named it Gordon's Programable Simulation System. The name was changed when IBM decided to release it as a product. The "General Program" part of the new name was to create a standard in waiting-line simulations.
