Glued laminated timber, also called glulam, is a type of structural engineered wood product comprising a number of layers of dimensioned lumber bonded together with durable, moisture-resistant structural adhesives. In North America the material providing the laminations is termed laminating stock or lamstock.. By laminating a number of smaller pieces of lumber, a single large, strong ...

Glued laminated timber - Wikipedia

A timber roof truss is a structural framework of timbers designed to bridge the space above a room and to provide support for a roof. Trusses usually occur at regular intervals, linked by longitudinal timbers such as purlins. The space between each truss is known as a bay.. Timber roof trusses were a medieval development. Earlier roofs had been supported by coupled rafters â€“ pairs of rafters ...
